

THE NANO-CERAMIC TECHNOLOGY

double layer of nano-ceramic technology to prevent sun's heat, saving the car's interior by wading off ultraviolet radiation to prevent inside car temperature and bring comfort without affecting visibility.

SAFETY AND SECURITY RhinePro Black Rescue Series safety film with Nano-Ceramic

applied to toughened, annealed or laminated glass, for security applications, where a delay of forced entry is desired. The performance of these films is affected by adhesive bong strength, thickness of the polyester, quality of application, and window structure/frame. PERSONAL SAFETY

When normal window glass is broken, it breaks into sharp shards

that are dangerous to anyone in the vicinity. Black Rescue Series window films have proven their worth in protecting people and property during seismic activity, bye helping retain window glass in its frame, thus prevent injury by falling glass.

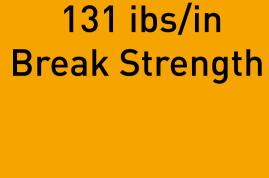

Indium Tin Oxide coating layer strongly absorbs

infrared and ultraviolet rays. Compared with a

metalized film, it solves the oxidation problem.

JPJ compliance

Why Choose

BLACK

Black Rescue is one of our best-selling product. It is affordable at the same

time do not compromise on the quality, this is a high-definition thermal

insulation film. This thermal insulation film technology was in the market for

more than 10 years, as time goes by, these film is selling at much lower

price compare to years ago. Therefore you don't need to spend a high price

to get a well known technology insulation film.
