

Colour stability is one of the first things you should look for in an automotive window film – yet we are the only brand to

COLOR STABILITY TEST

publish test data. In comparison to other leading products, Black Beauty series film are recorded as having the best colour stability after the 1000 hour test.

Heavy rain or excessive shine, we have developed our films to maximise visibility at all times of day, reducing

SUPERB CLARITY

glare, increasing clarity and altogether saving your eye from strain - allowing you to drive confidently and comfortably in all condition.

WINDOW FILM AFTER 2 YEARS? Our Titanium Nitride Window Film provides you with superior protection and maximum durability, afforded by

PROBLEM WITH YOUR FADING

the unique fusion of titanium and ceramic film. Here's a look at the benefits of our Titanium Nitride film versus other carbon or ceramic film. SUPERIOR QUALITY

With our dye-free, Titanium Nitride material, the Black Beauty series is made to last. Offering more than 7

years durability, clarity and colour stability.

SERIES

Black Beauty is our best-selling product. It is suitable for customers who likes darker window tint. It looks dark from the outside, but you see clearly from the inside, so this is a high-definition thermal insulation film. This thermal insulation film is made of three-layer sputtered nitrite technology (titanium nitride), which is not easy to fade. This will bring a little heat reflection to keep your car comfortable.
